1985: The Year in Review

Consumer Programs

Throughout much of 1985, Consumer Division activities focused on **commercial liability insurance**. As it became more and more apparent that an availability/affordability crisis was emerging in Illinois and the rest of the country, the Department intensified its efforts to provide relief to the small business community. These programs included:

- A conference of key legislators and insurance industry representatives to discuss the nature and scope of the problem; the growing incidence of midterm cancellations and rate increases; and the need to stabilize the Illinois market;

- Creation of a Market Assistance Unit within the Consumer Division to provide direct assistance to Illinois consumers unable to find liability insurance;

- A follow-up meeting with insurance producers and company management to review the status of the Illinois market;

- A written warning to Illinois commercial lines carriers to cease abusive market practices or face statutory restrictions on their rate-setting freedom;

- Adoption of the uniform underwriting guidelines developed by the National Association of Insurance Commissioners;

- A series of state-wide public hearings to permit direct testimony from consumers; and

- Establishment of the Illinois Insurance Assistance Program in cooperation with the insurance industry to provide a structured mechanism for addressing availability problems.

In November, the Illinois House of Representatives passed a Resolution (HR 831) requiring the Department of Insurance to compare rates in Illinois and contiguous states. The comparative data and a report on the liability insurance crisis in Illinois will be presented to the Governor early in 1986.

On December 30, 1985, Director Washburn disapproved a **comprehensive general liability** (CGL) **policy form** filed by the Insurance Services Office (**ISO**). In disapproving the form, the Director noted that while a great deal of progress had been made on problems highlighted during a public hearing and several meetings with other insurance departments and the public, the industry had failed to resolve three critical areas:

1) the ability of an insured to purchase "tail coverage" when insurance is cancelled for non-payment of premium,

2) a guarantee that the aggregate limit of liability in any extended reporting coverage for open claims will be at least a particular percentage of the expiring policy aggregate; and

3) a guarantee that the terminating insurer will provide necessary loss information on a timely basis so that the insured can obtain new quotes from other companies or determine insurance needs for the next year.

The ISO policy introduced the "claims-made" concept as an alternative to the occurrence basis policy that has traditionally serviced the comprehensive general liability insurance market. Illinois assumed much of the national leadership in forcing changes in the proposal to afford better protection and less confusion to small business policyholders.

Medical malpractice insurance continued to be of particular concern during 1985 as the list of active carriers and insurance alternatives dwindled. Individual doctors as well as clinics were given assistance in finding and retaining their insurance. The Department assisted a special task force appointed by Governor Thompson to study the medical malpractice issue. The Casualty Actuary and other staff members helped draft the task force report and contributed to the legislature's eventual reform package. Testimony was also given when the legislative changes were tested in the courts a short time after passage.

A number of major **organization changes** were made in the Consumer Division during 1985. The Division name was changed to the Consumer Market Division to more appropriately reflect the inclusion of market conduct and related activities in its scope of responsibilities. In order to accommodate the Division's growing involvement in specialized areas of consumer issues, a Special Projects Unit was established to coordinate and centralize the Division's educational programs, computer applications, and other initiatives that may have a Division-wide impact. Consumer service and product evaluation activities were regrouped within a Life/Accident and Health and a Property/Casualty Section.

The Market Conduct Examination Units were merged into a separate section rather than reporting to the Property/Casualty and Life/Accident and Health Policy Evaluation Units. During the year, the Life, Accident and Health Unit conducted 26 market conduct examinations, while the Property and Casualty Unit completed 36.

The Section maintained and expanded the market conduct examination data base which will eventually allow the staff to apply standards of performance to carriers. While the number of examinations was down for the year, the Section concentrated on target exams which gave examiners the flexibility to more readily respond to market problems. This was evidenced by three target exams which were conducted in response to the liability insurance crisis.

During 1985 the major emphasis for both the Producer Licensing Unit and the Producer Regulatory Unit was the implementation of the **Producer Article** of the Illinois Insurance Code which became effective January 1, 1985.

During the first six months of the year the Licensing Unit converted 111,000 agent licenses and 9,600 broker licenses—representing about 55,000 individuals—to producer licenses. During 1985 about 69,000 individuals were licensed as producers. All producers will renew their licenses on their anniversary date instead of March 1 of even numbered years.

In conjunction with Education Testing Service, the testing administrator, the Licensing Unit commenced using the KEYWAY automated scoring system which enables examinees to receive immediate score reports. In addition to quick score reporting the Licensing Unit began printing licenses on-line to allow a person to become licensed within as few as two or three working days after taking the test.

The Regulatory Unit revised its investigations and examinations to determine licensee compliance with the new producer article. The Unit concluded 52 financial examinations and 429 investigations during the calendar year. These investigations/examinations resulted in 71 revocations, 10 surrenders, 70 Stipulation and Consent Orders and $56,850 in civil forfeitures.

During 1985, the **Property/Casualty Consumer Services Unit** investigated 7,378 complaints from Illinois consumers. These complaints were geographically distributed as follows: Chicago 33%; metropolitan Cook County 33%; remainder of state 27%; and out-of-state 7%. The causes for complaint were: claim handling (60%); underwriting (33%); policyholder service (5%); and marketing and sales (2%).

The Chicago Office actively continued the operation of the relatively new **Community and Industry Affairs Division**. This Division assists consumers, state and local governments, consumer representatives and community organizations with insurance problems and disseminates information relative to insurance needs. Over the past year, the Division conducted numerous seminars, participated in radio and television programs and served on several committees addressing urban insurance market problems.

The P&C Consumer Services Unit was instrumental in implementing a new law requiring insurance companies to use only licensed auto repair shops to protect consumers from unscrupulous auto repairers.

In addition to reviewing 19,234 coverage forms and rate filings, the **Property/Casualty Product Evaluation Unit** was instrumental in reviewing the claims-made CGL policy filed by the Insurance Services Office. This Section was also responsible for implementing S.B. 907 which restricted mid-term cancellations on commercial insurance policies.

During 1985 the **Life, Accident and Health Consumer Services Unit** investigated 6,701 complaints from Illinois consumers. The geographic distribution was: Chicago 19%; metropolitan

Cook County 27%; remainder of State 48%; and out-of-state 6%. The causes for complaint were: claims handling (63%); policyholder service (25%); marketing and sales (7%); and underwriting (5%).

The **Life/A & H Product Evaluation Unit** received some 30,000 insurance form filings for use in Illinois. Of these, 11,430 life and 12,300 a & h filings were approved for use in the sale of insurance. Additionally, some 2,130 health insurance rate increases were filed, 932 of which were withdrawn based on lack of sufficient actuarial justification.

The Department of Insurance and the Department of Alcohol and Substance Abuse established a Joint Task Force to study the issue of third party payor mechanisms for rehabilitation treatment of these very serious social illnesses. The task force, consisting of providers, insurers, and support communities, has made significant strides toward a solution to the problem.

H.B. 306 established a task force to study insurance coverage for long term care. Chaired by the Director of Insurance, the task force is addressing all facets of long term health care for individuals and their families, particularly with regard to Alzheimers disease.

Financial/Regulatory Programs

Life, Accident and Health

Several regulatory problems that developed in the past few years were addressed in 1985. The failure of the insurance operations of the **Baldwin-United Corporation** in 1983 continued to be a major issue. The Illinois Department was heavily involved in the development of a program, commonly known as the enhancement plan, for increasing the ultimate payments to Baldwin-United policyholders. The integration of the enhancement plan with existing guaranty association coverage is an issue we continue to deal with on both a state and national level. Not only are we concerned about the extent of coverage for Baldwin-United policyholders specifically, we have also identified similar issues for different types of insurance products. Illinois has been a leader in addressing these issues by chairing the National Association of Insurance Commissioners' (NAIC) Task Force on Insurance Guaranty Associations.

The Life, Accident and Health Division was instrumental in developing **statutory changes to improve the solvency** of life insurance companies doing business in Illinois. During 1985, legislation passed increasing the minimum net worth (capital and surplus) requirements for both stock and mutual life insurance companies. The old law had total capital and surplus requirements ranging from $400,000 to $1,050,000, depending upon the date the company was licensed. The new law increases those requirements over a period of ten years to $1,500,000 for all life and health companies. This law will help protect policyholders against insurance company failures by increasing the cushion between net worth and insolvency, and enabling the Department to take quicker action when a company is losing money and its net worth is quickly depleting.

The Illinois General Assembly also passed a law which allows the Director to issue **corrective orders**. Under this law, the Director may require specific action to correct problems potentially harmful to the financial viability of an insurance company. This law gives the Department more authority to initiate direct action against problem companies without having to go through a formal rehabilitation process.

Changes in the economy have had a profound impact on the direction in which life insurance companies have moved and the challenges that companies must continue to face. During 1985 interest rates declined rapidly and greatly. This situation forced life insurance companies writing interest-sensitive business, such as deferred annuities and universal life insurance, to re-think their **investment strategies**. Companies could either increase the duration of their bond portfolio, decrease the quality of their investments, or reduce the interest crediting rates on the products sold.

None of the actions are without pitfalls. The Department has continued to improve its monitoring of the investment operations of life insurers through increased analysis of the interest spread, i.e. the difference between investment yields and crediting rates, quality of the bond portfolio and the degree of matching between the cash flows of assets and liabilities.

Besides interest rates, the other economic variable of importance to the life insurance industry is **medical care inflation** which lowered in 1985. The continuation of this trend will undoubtedly bring increased competition in the accident and health insurance market as more companies perceive this business as being profitable. Likewise, the increased growth of health maintenance organizations (HMO's) has increased the degree of competition. HMO enrollment in Illinois has grown from 734,000 in 1984 to 987,000 in 1985. Commercial insurers have responded by forming preferred provider organizations (PPO's) and combining with HMO's and PPO's in offering multiple option programs.

Competition will favor the consumer through the development of new products with the lowest possible price, but competition is not without its drawbacks. Excessive price competition in conjunction with unrestrained growth can lead to financial failures. The Life, Accident and Health Division has responded to these developments by implementing several measures:

1. Developing an Accident and Health Risk Ratio Rule which requires companies to notify the Division if premium growth during the year exceeds certain levels.

2. Assisting in the amendment of the Health Maintenance Organization Act. Some of the important aspects of the amendment are that the initial and ongoing net worth requirements have been strengthened, and the term "impairment" has been defined.

3. Expansion of the Department's claim reserve adequacy analysis.

4. Expansion of the Department's reinsurance monitoring system.

Financial solvency monitoring, as always, is a top priority with the Department. The latest improvement in this function has been the use of **personal computers** by both field examiners and in-house staff. The impact of this action is two-fold: field examiners now have the capability of utilizing more sophisticated techniques in their field examinations, and in-house staff are able to utilize the computer in a more cost-efficient fashion. This technology has permitted quicker detection of financial insolvency than was possible using manual techniques. A potential result of this is a minimization of the financial and emotional loss to policyholders, and a lowering of the cost to the Guaranty Association.

Greater reliance on sophisticated computer technology becomes even more necessary as the number of **life insurance companies licensed** in Illinois increases. In 1985, 39 new companies were licensed to do life and/or health insurance business in Illinois. The following chart shows the type and number of companies licensed as of December 31, 1985. The **financial examination** staff completed 44 financial examinations of domestic companies in 1985. Included in this number are full-scale financial examinations of ongoing companies, limited or special purpose examinations, and pre-operational examinations.

Property/Casualty

During 1985 many property and casualty insurers discovered their financial stability threatened by continuing underwriting losses and loss reserve development. In response to this challenge, the Property and Casualty Division was partially reorganized by creating a **Financial Surveillance Section** comprised of both financial analysts and actuarial examiners. During the year, nearly 5% (35) of the p & c companies licensed to transact business in Illinois required formal regulatory action ranging from voluntary agreements memorialized by board resolutions or letters of understanding to actual revocation of certificates of authority. The Department was also able to use a newly enacted statute authorizing the Director to issue corrective orders in certain circumstances.

Increasing concern about the financial stability of many offshore reinsurers caused the Department to propose rules which set forth provisions to be required in **letters of credit** (LOC) used to collateralize reinsurance receivables. In the event of serious loss, the LOCs may be the only source of recovery.

During 1985 the Department also drafted a comprehensive regulation on the insuring of **municipal bonds**. Because this relatively new type of financial guarantee is usually written in amounts far exceeding those commonly written in other surety lines, coupled with the economic nature of the risk assumed, it requires a different regulatory approach than applicable to other property and casualty insurance. The proposal is currently being considered for adoption by the Joint Committee on Administrative Rules.

Many insurance companies have suffered serious, sometimes irreversable, losses because of the action of a **Managing General Agent**. Although MGAs provide needed services for their companies, a few, once they have full underwriting powers, have caused serious harm because of uncontrolled and irresponsible premium writings. The Department therefore proposed legislation, effective September 20, 1985, which requires that the Department be notified when any single insurance producer or managing general agent, no matter where located, produces in excess of 5% of a domestic company's business within any calendar quarter. The agency contract with any such large producer must permit the agent's records to be examined by Department examiners.

It is not uncommon for certain individuals who somehow control large blocks of poor business to go company to company, sometimes state to state, offering their service as a managing general agent. Companies needing improved cash flow often find such offers irresistible. Should the contract be with an agent with a history of irresponsible underwriting, the Department may require that the contract be modified to contain more restrictive provisions or that it be terminated.

A new **surplus line law** (Section 445 of the Illinois Insurance Code) which became effective on February 27, 1985, creates the Surplus Line Association of Illinois. The Association will stamp and record every surplus line policy written. The law further requires surplus line producers to become members.

On April 3, 1985, the Director appointed an Interim Board to conduct the election of the permanent board, which was held on April 29, 1985. The Association became fully operational (staff, location, equipment, etc.) and stamped and recorded its first surplus line policy on July 1, 1985.

The first six months the Association was operational it processed 17,978 policies. The premium amounted to $78,766,647.

The role of the financial examiners has shifted from conducting routine triennial examinations to target examination of companies experiencing financial difficulties. When financial analysts detect potential problems which cannot satisfactorily be explained by management, examiners are immediately dispatched to evaluate the extent of the problem.

The **P&C Examination Section** completed a total of 55 examinations (37 comprehensive and 18 limited) in 1985. The total compares favorably to calendar year 1984's figure of 54 even though the field staff was reduced by two midway through 1985.

After development of a procedures manual and additional staff training, the Examination Section also began preparations to examine some of the 146 **farm mutual insurance companies** operating in the state. For most farm mutual managers in this often forgotten segment of the insurance industry, it will be their first visit from a representative of the Illinois Department of Insurance.

In another arena, after sometimes lengthy investigation by the Operations and Marketing Section, fourteen **"service contract" firms** were ordered to cease operations in Illinois because they failed to meet qualification as authorized insurers.

Summary of 1985 Insurance Legislation

The 1985 session of the Illinois General Assembly was highlighted by the passage of several solvency-related measures drafted by the Department of Insurance.

The Department's "solvency package" included bills which:

- amend the Holding Company Article with respect to inter-affiliate transactions.
- increase the minimum capital and surplus requirements.
- give the Director authority to issue corrective orders.
- raise certain filing fees and establish the Insurance Financial Regulation Fund within the State Treasury.
- require the Director's approval of certain Managing Agency contracts.
- require the Department to begin regulating third party administrators.

Other major legislation enacted by the Illinois General Assembly during 1985 and signed by Governor Thompson includes:

- a medical malpractice reform package.
- authority for designation of preferred provider organizations.
- prohibition of mid-term cancellation of commercial insurance policies except under certain circumstances.
- a new Fraternal Article in the Insurance Code.

Following is a summary by category of those bills which most directly impact on the regulation of insurance in Illinois:

Financial & Corporate Regulation

The Agreement, effective year end 1983, was subject to a final accounting and several other conditions which were concluded in 1985.

Upon the entry of the Order of Liquidation, the Illinois Life and Health Insurance Guaranty Association was activated. The Guaranty Association is paying covered claims and continuing coverage as appropriate on the policies not assumed by United Founders.

Main Insurance Company

On January 19, 1977, the company was placed into rehabilitation, and the Director of Insurance was appointed as Rehabilitator. The Special Deputy attempted to rehabilitate the company and also to establish the company's true financial condition.

Upon completion of an examination of Main's records, it was determined the company was insolvent. A petition was then filed by the Rehabilitator in the Court in November 1980, requesting an Order of Liquidation with a finding of insolvency. Management of the company opposed the Order of Liquidation, and on October 20, 1981, a trial court entered an order denying the petition for liquidation. On June 22, 1982, a trial court vacated the original ruling and found Main to be insolvent, but imposed a stay against the enforcement of the order pending resolution of an appeal.
